Exposure Testing to Automotive Fluids via Soaking, Exposing, Spraying: Various components such as filters, hoses, plastic parts etc. can be soaked, sprayed, or exposed to various fluids to determine compatibility or reaction such as deforming, cracking, swelling, etc.

Automotive Fluids & Compatibility Testing

Transmission fluid inspection requires a technician trained in the art of detecting viscosity decrease, contaminants and abnormally burned fluid. Power steering fluid inspection requires the trained eye of a service professional. Abnormal levels of contamination, fluid shearing, and seal damage may be overlooked by the untrained eye.

It's all about the fluids! | BG Products, Inc.

Some car fluids like transmission fluid, power steering fluid, gear oil, motor oil and antifreeze can be processed and recycled into new fluids. Fuel and other flammable liquids are considered hazardous and, therefore, must be stored and disposed of properly, but many of them can be recycled or reused as alternative fuels.
