I have one question about alternator check in Cessna 152. During engine run-up we should check whether alternator is working or not, so we switch it off and then the warning light should illuminate. But we do it on pretty high RPM (1700). Would this warning light illuminate if I switch off the alternator also on lower RPM i.e. idle?

To rent aircraft from FBOs, you normally do a checkout flight with one of the company's instructors. Yesterday, I followed through with my plan to make a transition to the Cessna 172, becoming eligible to rent and fly the plane solo. I did this because the Cessna has 4 total seats vs. the Tecnam's two.
