Mendel & Inheritance - powerpoint presentation covering basics of genetics

Genetics - The Biology Corner

Genetics tries to identify which traits are inherited, and explain how these traits are passed from generation to generation. Some traits are part of an organisms' physical appearance; such as a person's eye color, height or weight. Other sorts of traits are not easily seen and include blood types or resistance to diseases. Some traits are inherited through our genes, so tall and thin people tend to have tall and thin children.
