You can search for a specific title or browse by genre (books in the same genre are gathered together in bookshelves). It's a shame that fiction and non-fiction aren't separated, and you have to open a bookshelf before you can sort books by country, but those are fairly minor quibbles.

This is a basic Chilton's type repair manual for Farmall tractors. It is printed on thin paper. The index system is based on paragraphs instead of pages which is odd. It does not go into detail about magnetos. It does though offer enough exploded views of the entire tractor with instructions to at least get you started if you are **CAREFUL** in repair.
