Relativity. The Special and General Theory. From the age of Galileo until the early years of the 20th century, scientists grappled with seemingly insurmountable paradoxes inherent in the theories of classical physics. With the publication of Albert Einstein's "special" and "general" theories of relativity, however, traditional approaches to solving the riddles of space and time crumbled.

The key difference between general relativity and special relativity is that general theory of relativity deals with space-time continuum whereas special relativity only deals with the inertial frames. Albert Einstein proposed the special theory of relativity in 1905. Later, he proposed the general theory of relativity in 1916.
