When Driving Downhill In A

I've got some downhill driving tips for you that I learned firsthand while driving through the hilly Smoky Mountains recently. I (finally) figured out the proper use of 2 and 1 on my automatic gear shift on this road trip! Learning how to drive downhill without using your brakes -- and using engine braking instead -- will make your mountain driving experience SO much more enjoyable, trust me.

How To Drive Down Steep Hills ... - Travel Hacks Guide

Rules of driving require special attention: when vehicles meet on a steep, narrow road which is not wide enough for two vehicles, the vehicle going downhill must yield the right-of-way by backing up to a wider place or by stopping to leave sufficient space for the vehicle going uphill, except where it is more practical for the vehicle going uphill to return to a wider space or turnout.

Slow Down. Not only should you adhere to the posted speed limit when driving in wet weather conditions, you should drive considerably slower than you normally would. Wet roads are very dangerous. Your vehicle's reaction time is much slower when it is raining. Reduced speed is imperative in rainy weather.

Driving in the Rain - 10 Crucial Things To Know

Cars approaching downhill, may be unable to stop without skidding. Try to leave a 10 second gap between you and the car in front. The 10 second gap allows for increased stopping distances, and gives you time to respond if the car in front has problems.

How to drive in snow and ice safely

An expert in bad-weather driving tells how to remain in control on snow- and ice-plagued highways and roads. See what you need to do to keep yourself and your family safe.

Tips for Safe Driving on Snow and Ice | Edmunds

Likewise changing gears with only a finger or two just doesn't cut it as good driving. Sometimes when down-changing from fifth in many cars a driver may inadvertently try and select reverse instead of fourth gear. Thankfully with some cars the shift pattern will not allow reverse to be selected accidentally without returning to neutral first.

CHANGING GEARS (Safe Drive Training)

Keep your speed down and allow more time to stop and steer; Finally, it's important to think about the environment that you're driving in, especially microclimates that might appear on the road. These are areas that perhaps the sun hasn't got to, which could stay icy when the rest of the road
